Motivated and detail-oriented computer engineering graduate seeking a challenging role in a dynamic environment where I can contribute to meaningful projects, grow professionally, and make a positive impact on the organization.

Experience

True Technologies   *June 2023 - July 2023*

- **Web Developer Intern**
- Developed and maintained web applications using HTML, CSS, and JavaScript. Contributed to various projects, focusing on responsive design and functionality. Gained hands-on experience in front-end development

Projects

Portfolio   *Live*

- Developed a personal portfolio website featuring detailed background information and skills.
- Included a section highlighting various projects to showcase technical expertise.

Academy Catalog   *Live*

- Developed a dynamic React application that connects to an API, featuring a search bar and a scrollable list of items.
- Implemented keyword-based search functionality to display relevant list items in real-time.

SoftEdge   *Live*

- Developed a modern, responsive website with a sleek, light-themed design using React.js and Tailwind CSS.
- The site features interactive UI elements, a compelling hero section with background videos, and flexible pricing plans.
- Focus was on enhancing user experience with smooth transitions and accessible design.
